My portfolio

Philippe ROUMBO

Junior Analytics Engineer

I build **reliable, production-ready data pipelines** end to end: from ingestion on **Databricks** and **Azure Data Factory**, through deployment with **Azure DevOps**, to **Power BI** dashboards. Always starting from the business need, I deliver **high-quality, usable data that drives better decisions**. Open to **fixed-term or permanent** positions.

Professional Experience

Coach: Colas Hackathon
May 2026 COLAS DS 43 rue Marcel Bonnet, 94230 Cachan

- Coached student teams from **2 engineering schools** (ESTP and EFREI).
- Mentored the teams and led them to **1st place** in the hackathon.

Data Analyst
Since March 2026 Colas Digital Solutions Vélizy-Villacoublay

- **Collect, prepare and analyze data** from multiple sources to address management and performance questions.
- Design and evolve data models and **Power BI dashboards** to track activities, trends and key business KPIs.
- Implement **consistency, completeness and quality checks** to ensure reliable data and indicators.
- **Gather business requirements** and translate them into business rules, data models, transformations and reporting solutions.
- Deliver **Data Engineering projects with Azure Data Factory and Databricks**: ingest data, run and monitor jobs, and structure processing along a Bronze, Silver and Gold medallion architecture.
- Develop **data transformations in Scala** and query data in **SQL**.
- Set up and run **CI/CD processes with Azure DevOps** to ensure traceability, versioning and deployment of changes.
- Document data processes and collaborate with business and technical stakeholders in an **Agile** environment.
- Integrate **carbon data** (emission factors, category reference data) into a shared Power BI semantic model.
- Design and deliver **a POC to improve BI report governance**.

Data Consultant
Nov. 2025 – Feb. 2026 DrNIKO / TECHNIKO Villetaneuse

- Understood and analyzed client needs.
- Carried out **benchmarks**, **comparative analyses** and **scoring** systems to measure the performance of various artificial intelligence solutions.
- Formulated operational and strategic recommendations tailored to stakeholder needs.
- Produced clear, concise deliverables for technical and non-technical audiences.

Education

Master's Degree in Big Data & Business Intelligence (graduated)
2024 – Sept. 2026 Université Sorbonne Paris Nord

Bachelor's Degree in Economics & Management
2022 – July 2025 Université des Antilles Pointe à Pitre

Skills

Data Engineering
Databricks, Spark, PySpark, Azure Data Factory, Scala, Bronze–Silver–Gold architecture, data ingestion and transformation, job execution and monitoring.

Cloud & DevOps
Azure, Azure DevOps, CI/CD, Git/GitHub, Docker.

Business Intelligence
Power BI, DAX, Power Query, KPIs and data visualization.

Data & Programming
SQL, Python, data modeling, data quality and reliability.

Consulting & Transformation
Requirements gathering, problem framing, benchmarking, recommendations, process improvement and user support.
