Philippe ROUMBO

Junior Analytics Engineer (permanent role)

Final-year Master's student in Big Data & BI and data intern at Colas Digital Solutions, I am looking to join your team as an Analytics Engineer. I work across the whole data chain: designing pipelines on Databricks and Azure Data Factory with a Bronze, Silver and Gold medallion architecture, checking data quality, industrializing changes with Azure DevOps, then turning the data into Power BI insights. I like to understand the business need before building the technical solution, and I would be glad to bring these skills to your projects.

Work experience

Data Analyst Intern
Since March 2026 Colas Digital Solutions Vélizy-Villacoublay

- Delivered **data engineering projects with Azure Data Factory and Databricks**: ingestion of data from multiple sources, job launching and monitoring, processing structured with a **Bronze, Silver and Gold medallion architecture**.
- Developed **data transformations in Scala** and queried data with **SQL**.
- Implemented **consistency, completeness and quality checks** to ensure reliable data flows and indicators.
- Set up and monitored **CI/CD processes with Azure DevOps** for traceability, versioning and deployment of changes.
- **Gathered business requirements** and translated them into business rules, data models, transformations and **Power BI dashboards** tracking KPIs.
- Documented processing and worked with business and technical stakeholders in an **Agile** environment.
- **Built a proof of concept to improve the governance of BI reports.**

Coach: Colas Hackathon
May 2026 COLAS DS Cachan (France)

- Coached student teams from **2 engineering schools** (ESTP and EFREI) on understanding the need, analyzing the problem and structuring the solution.
- Helped the team win **1st place** through coaching focused on framing, analysis and final presentation.

Data Consultant Intern
Nov. 2025 – Feb. 2026 DrNIKO / TECHNIKO Villetaneuse

- Analyzed client needs and built **benchmarks**, **comparative analyses** and **scoring** systems to assess the performance of AI solutions.
- Formulated recommendations and produced presentation materials for technical and non-technical audiences.

Education

Master's in Big Data & Business Intelligence
Since 2025 Sorbonne Paris Nord University Villetaneuse
In progress

Bachelor's in Economics & Management
2022 – July 2025 University of the French Antilles Pointe-à-Pitre, Guadeloupe

Skills

Data Engineering
Databricks, Spark, PySpark, Azure Data Factory, Scala, Bronze–Silver–Gold architecture, data ingestion and transformation, job launching and monitoring.

Data quality & reliability
Consistency and completeness checks, data reliability, processing documentation.

Cloud & DevOps
Azure, Azure DevOps, CI/CD, Git/GitHub, Docker.

Data & programming
SQL, Python, data modeling; requirements gathering and Agile methods.

Business Intelligence
Power BI, DAX, Power Query, KPIs and data visualization.
